Joined Global Covenant of Mayors Iniciative

2023

GLOBAL COVENANT of MAYORS for CLIMATE & ENERGY

ENERGY PRODUCTION

MAIN SOURCES OF ENERGY GENERATED

NATURAL gas

RENEWABLES

MOBILITY PATTERNS

Amasya's narrow streets and pedestrian-friendly zones promote public transport use. Recent efforts focus on improving sustainable mobility, reducing congestion, and enhancing connectivity between urban and rural areas.

KEY INTERESTING FACTORS

Efficient irrigation
Renewable Energy
Sustainable Agriculture

KEY AREAS FOR COOPERATION

Transportation Infrastructure
Renewable Energy Utilization

TOPICS OF INTEREST

Business Models and Financing Schemes
Sustainable Projects implementation

Amasya Municipality signed the Global Covenant of Mayors in 2023, demonstrating its commitment to combating climate change and achieving sustainable development goals. Within this framework, the municipality has begun preparing its Sustainable Energy and Climate Action Plan (SECAP). As a member of the MLGP4Climate platform, Amasya also aims to strengthen the role of local governments in addressing climate challenges.

Commitment to Sustainable Development and Innovative Solutions

COLLABORATION

COORDINATING W/ LOCAL STAKEHOLDERS

COORDINATION W/ INTERNATIONAL PARTNERS

NATIONAL GOVERNMENT

Amasya Municipality is steadfast in its commitment to sustainable development, aiming to achieve balanced growth across environmental, economic, and social domains. This involves formulating comprehensive strategies and projects that prioritize the protection of natural resources and the minimization of environmental impacts. By signing the Mayors' Covenant and launching a climate adaptation action plan, the municipality showcases its dedication to combating climate change.

Amasya Municipality is open to cooperation in transportation infrastructure, renewable energy, water and wastewater management, ecosystem protection, and sustainable project financing. It also aims to develop partnerships for cultural heritage preservation and energy efficiency within both national and international frameworks.

POTENCIAL AREAS

WATER TREATMENT

RENEWABLE ENERGY

PROTECTING ECOSYSTEM

Implementation of Sustainable Projects

Wastewater Treatment Facility (2015)

Solid Waste Recycling Centre 2011)
