

SECAP process and the benefits of reporting climate actions via CDP-ICLEI Track

CDP and ICLEI

AGENDA

- ▼ Intro
- ▼ Overview of CDP-ICLEI track and its benefits for cities (Lea)
- ▼ How to fill in the Energy/Climate Finance section (Lea)
- ▼ 2022 Turkish Data Insight (Lea) (2 min)
- ▼ Why is Reporting Important? (Nicola)
- ▼ Framework alignments
- ▼ ICLEI and the use of CDP-ICLEI Data
- ▼ Examples of application of CDP-ICLEI data in Europe

Please put your questions in the Q&A box so we can answer them at the end of the webinar!

CDP-ICLEI Track – an Overview

CDP: VISION AND MISSION

14,000+ cities, regions, companies disclosed through CDP in 2022

CDP is a global environmental non-profit working to secure a thriving economy that works for people and planet in the long term.

We aim to make environmental reporting mainstream and provide detailed insights to drive action for a climate safe, water secure, deforestation free world.

ICLEI AROUND THE WORLD

ICLEI – Local Governments for Sustainability is a global network of more than 2500 local and regional governments committed to sustainable urban development

**2500+ LOCAL
AND REGIONAL
GOVERNMENTS**

**25 OFFICES
WORLDWIDE**

**ACTIVE IN
125+
COUNTRIES**

**IMPACTING
MORE
THAN 25% OF
PEOPLE LIVING

Benefits of reporting

Best practice and knowledge exchange

- ▶ Training webinars
- ▶ Reports and case studies
- ▶ Workshops

Report to city networks

- ▶ ICLEI
- ▶ C40
- ▶ Global Covenant of Mayors
- ▶ WWF's One Planet City Challenge

Access insight, tools and services

- ▶ Feedback through CDP Scoring
- ▶ Receive response check

Transparency and accountability

- ▶ Track progress
- ▶ Improve data quality
- ▶ Access data on CDP's Open Data Portal

Engage with the private sector and public financiers

- ▶ Showcase projects through CDP's Matchmaker and ICLEI's Transformative Actions Program
- ▶ Engage private sector through City Business Climate Alliance programme

CDP - The One-Stop-Shop for environmental reporting

Cities A List 2022

- ▼ **Over 1000** scored in 2022.
- ▼ **122 cities** have made the 2022 Cities A List
- ▼ Showing there is **real leadership on environmental action & transparency** at the local government level

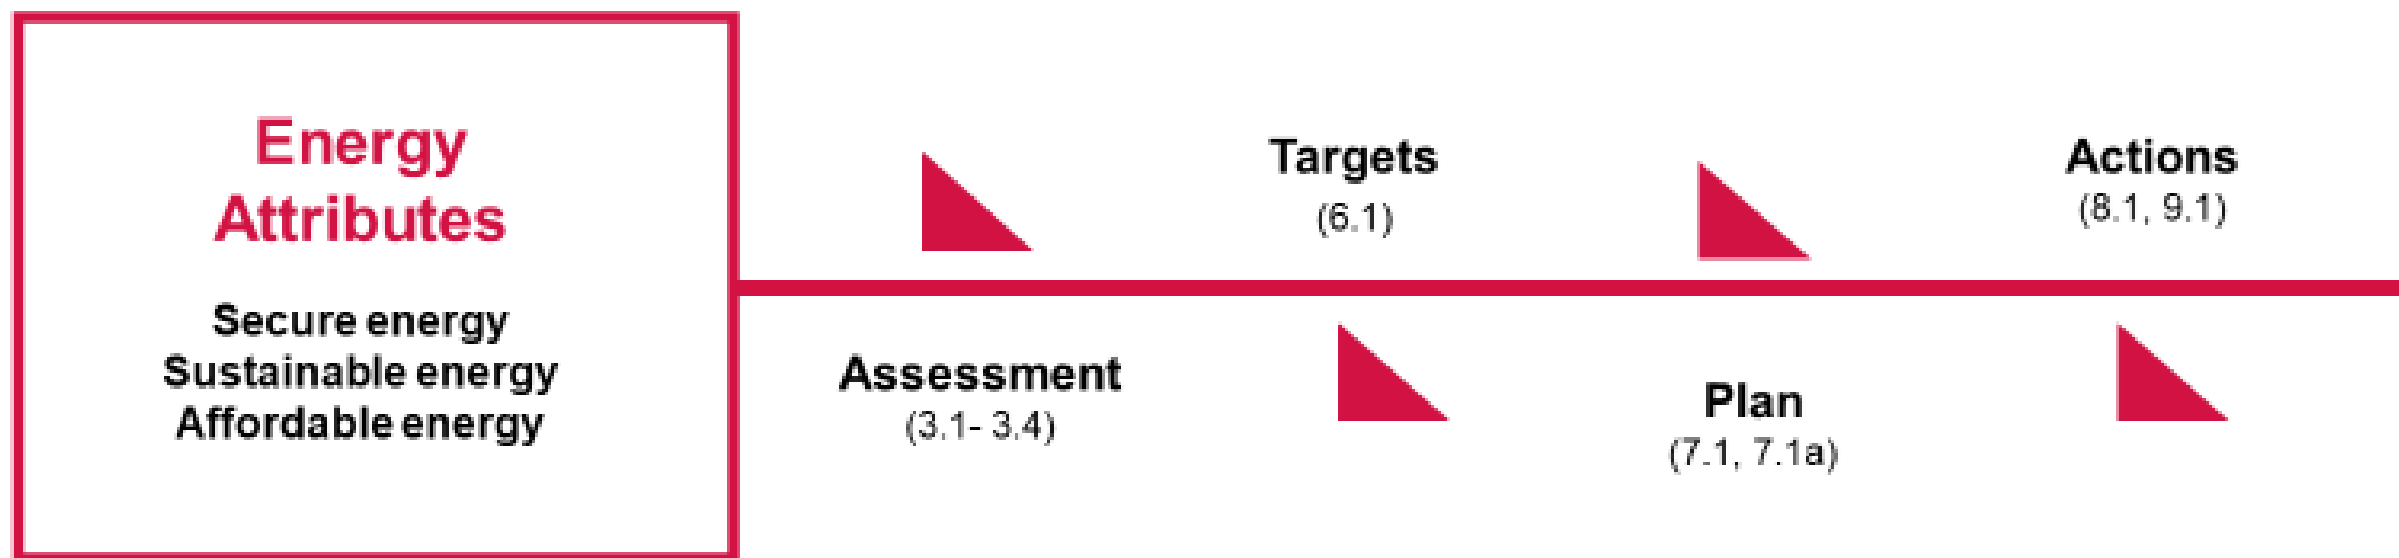

Energy section and reported energy actions from Turkish cities

Alignment with Reporting Requirements

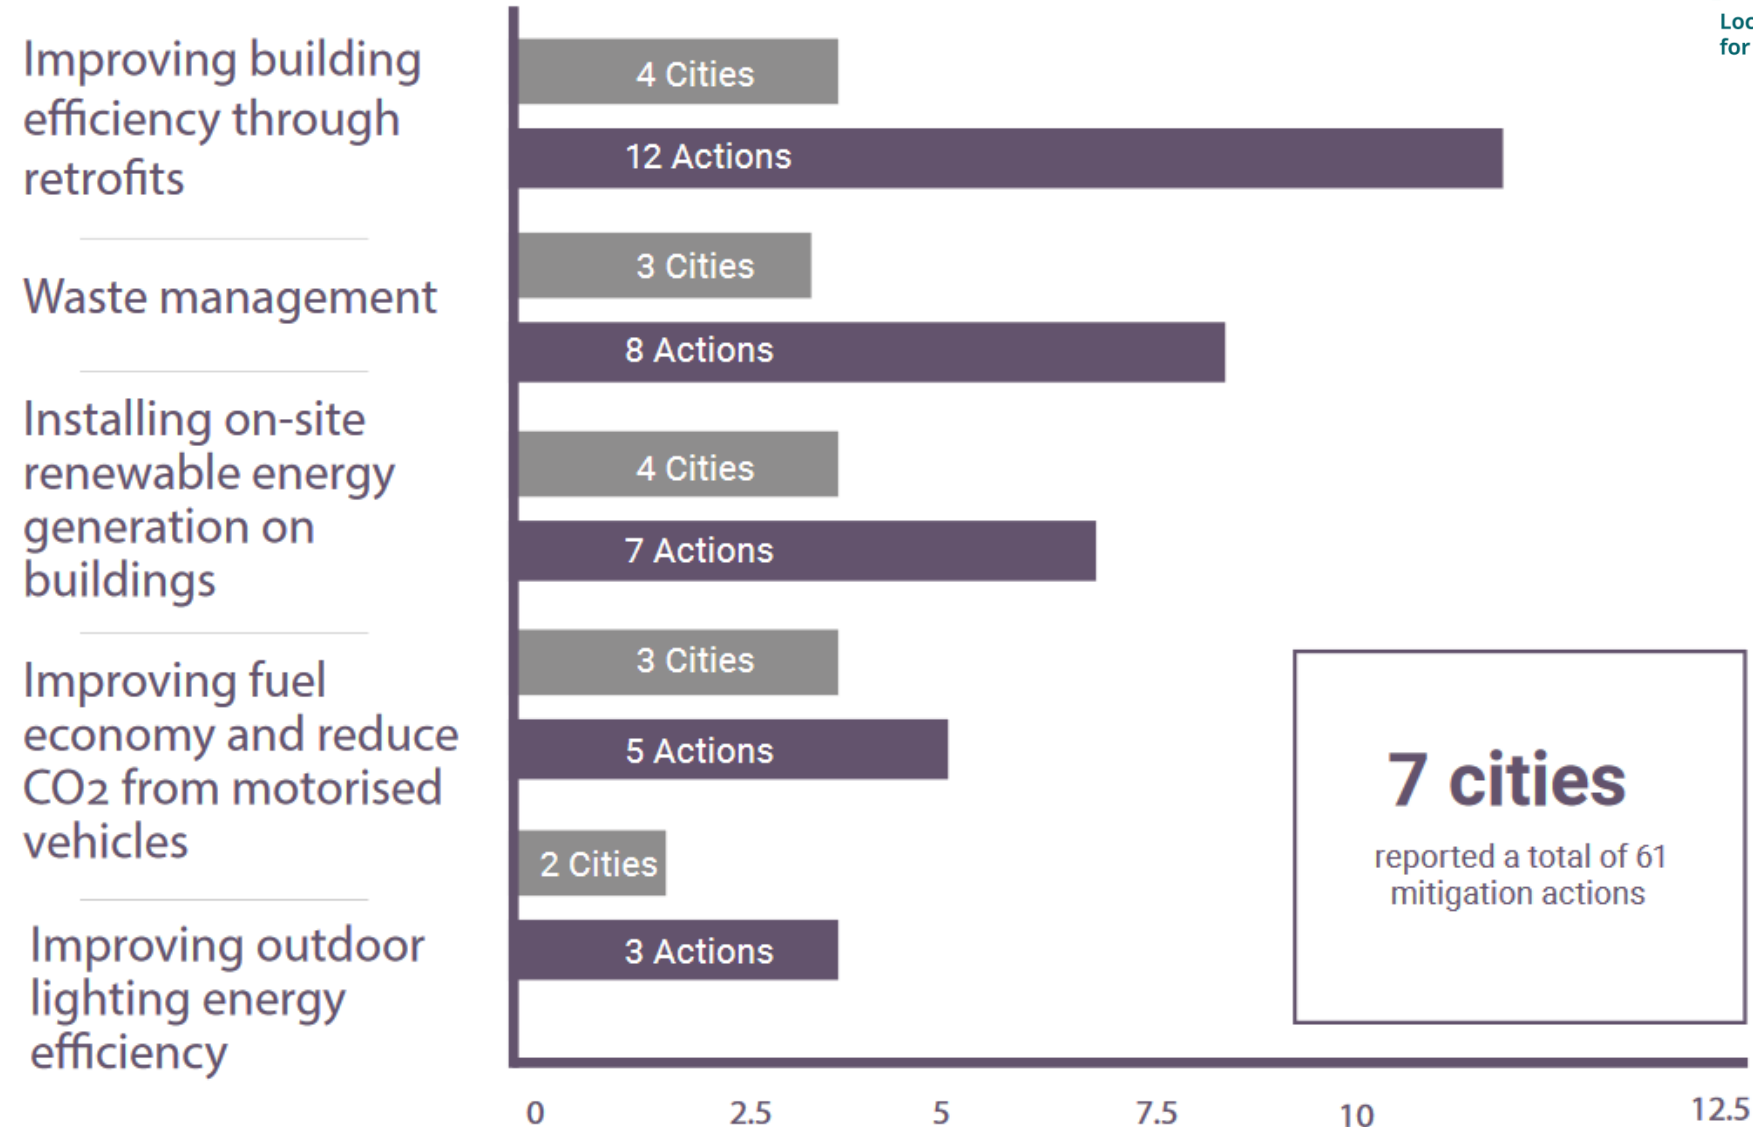

GCoM Energy Pillar

- Publication of EAPP in 2023 and reporting of mandatory indicators has been integrated in CDP-ICLEI Track
- Builds on current energy questions, with added simplification and flexibility for cities to report on what is relevant to their region and context
- Mandatory data points are indicated by the symbol ^
- Link to the new set of energy questions [here](#)

The 5 most reported mitigation actions

Kadıköy, Turkey | Improving energy efficiency across the district

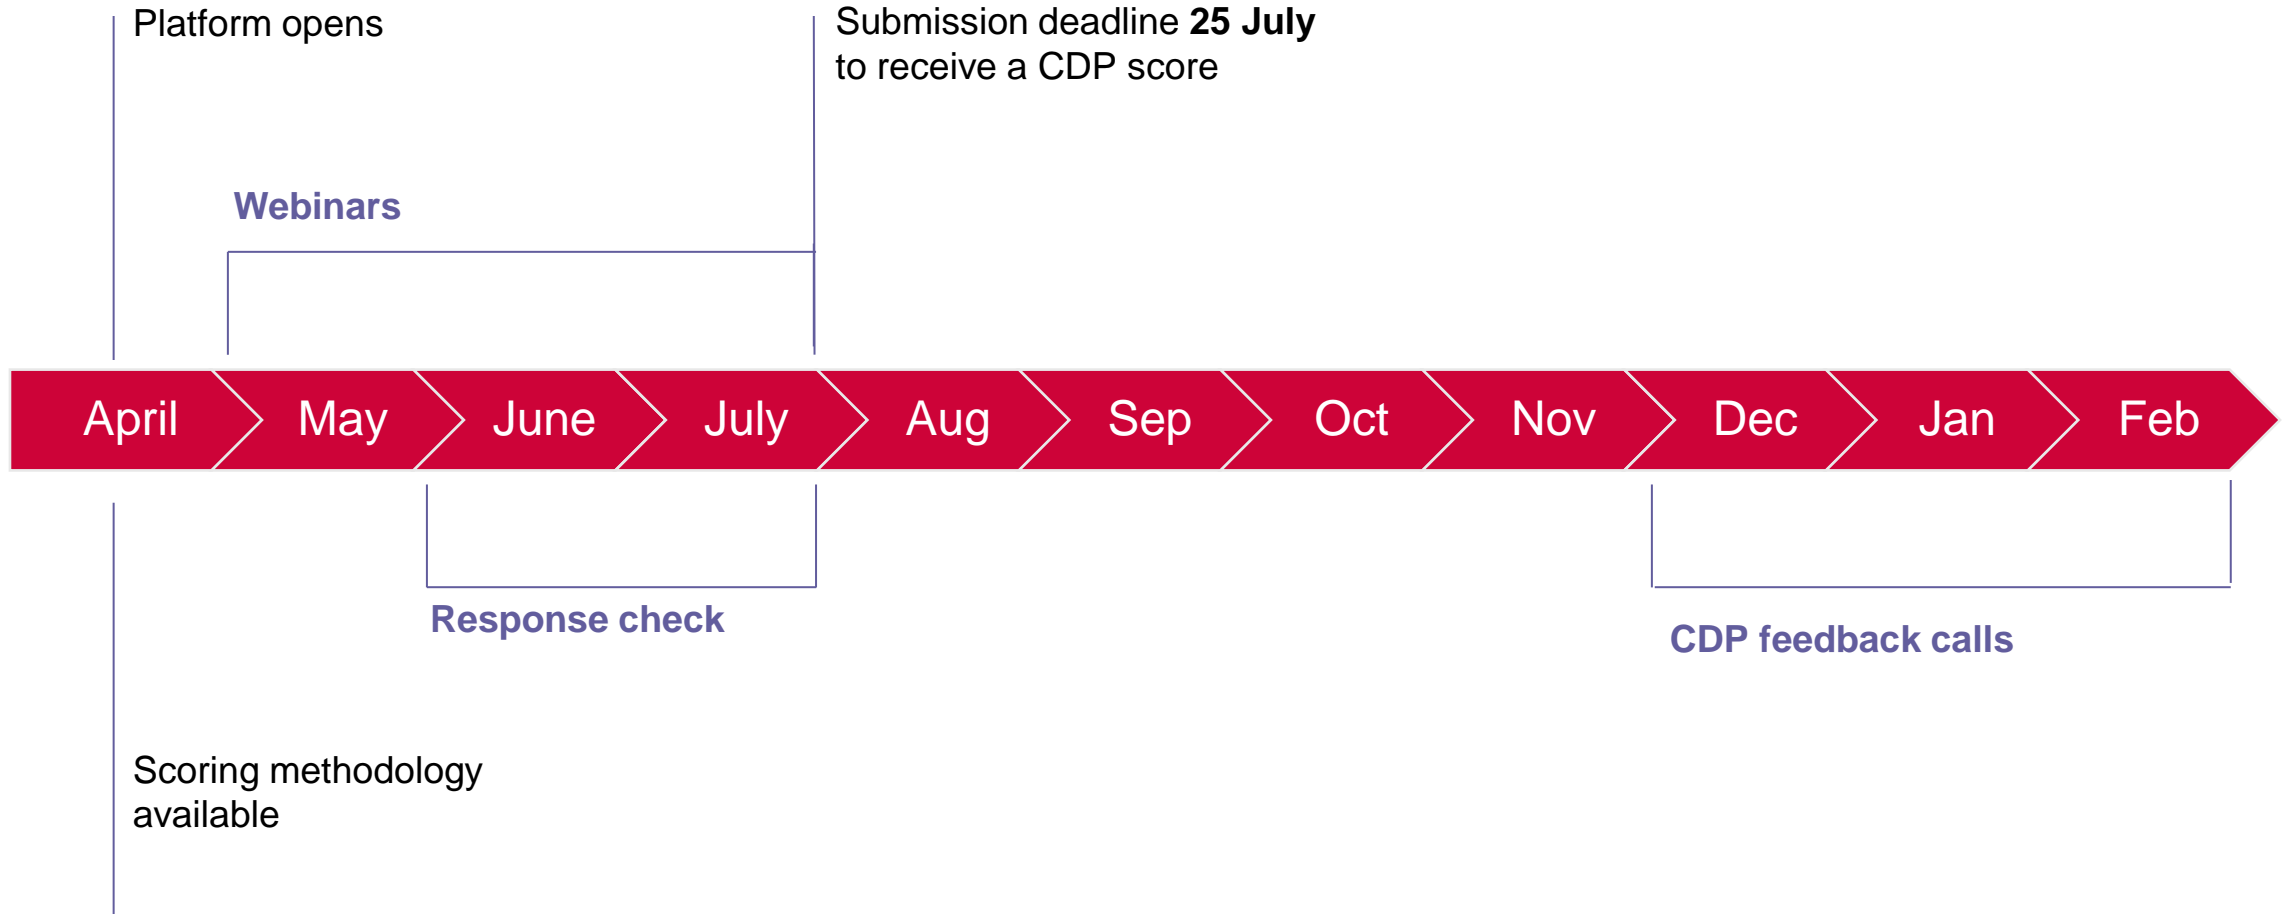

Kadıköy Municipality, a central district in the city of Istanbul, is one of the leading local governments in Turkey with innovative climate action projects. Their commitment to achieve a **40% reduction in emissions by 2030** has led them to develop multiple energy efficiency projects across the district, supported by the necessary changes in financial and regulatory frameworks.⁸ The Municipality engaged with multiple stakeholders throughout the strategy development phase to ensure they met their needs and expectations. An important focus area is the **retrofitting of buildings**, which has the potential to improve energy efficiency by 35%.

Projects include:

- ▼ Improved **thermal insulation** for existing buildings to reduce energy and coal consumption.
- ▼ Heating 25% of residential buildings with a district heating system using **alternative fuels** (e.g. biomass, waste heat).
- ▼ **Energy efficient lighting** systems.

2023 timelines

CDP-ICLEI Track - The importance of reporting climate and environmental local data

Why is reporting to the CDP-ICLEI Track important?

Better understanding of local context to tailor global initiatives and financial support

Expert assistance on climate action planning at city level
– SECAP/SEACAP; R&V; GHG inventory etc.

Direct support to cities on science based data and target setting to be in line with a 1.5 degrees future

Advocacy tool at the regional and international level for sectoral NGOs and organisations towards COPs

Aggregated data analysis for science, R&I and finance

1. Framework Alignment

Reporting for Global-level initiatives:

For more information
view:
[2022 Cities
Framework Alignment
Map](#)

2. Framework Alignment

Aligning with global reporting standards for SDGs, SBTs and financial disclosure

For more information
view:
[2022 Cities](#)
[Framework Alignment](#)
[Map](#)

SCIENCE BASED TARGETS NETWORK
GLOBAL COMMONS ALLIANCE

3. Framework Alignment. Global Covenant of Mayors for Climate & Energy (GCoM)

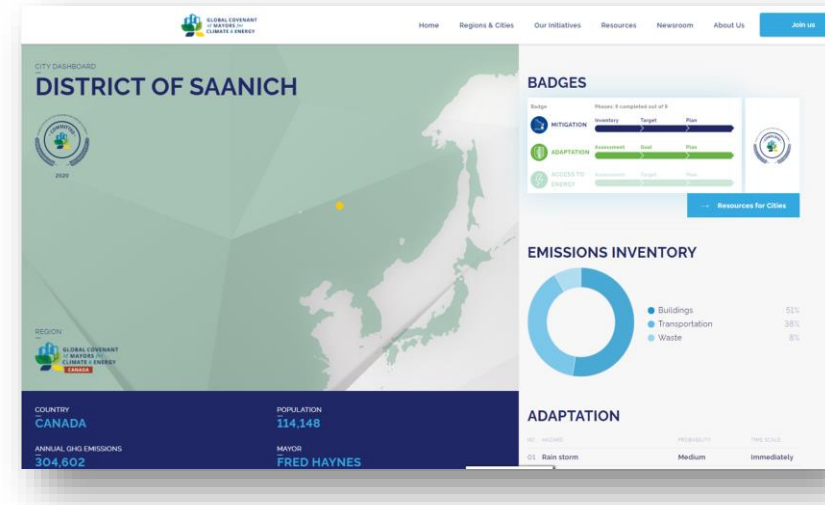

CDP-ICLEI Track primarily serves as the reporting within the GCoM alliance worldwide

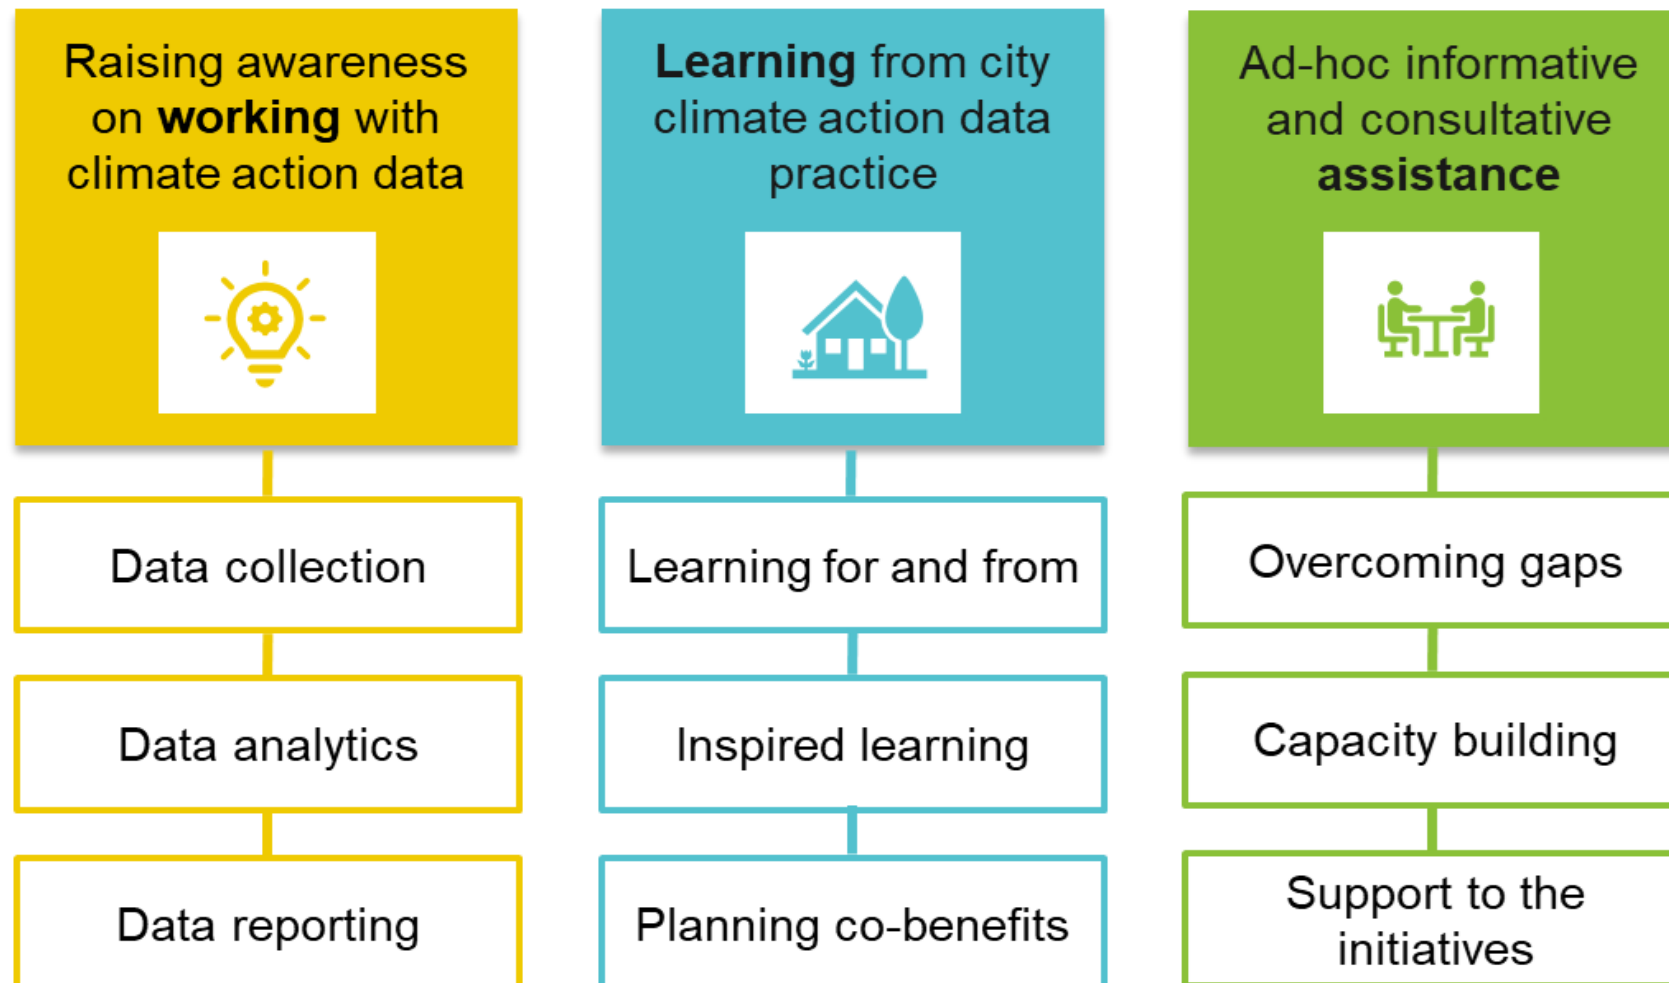

- Report towards all GCoM Badges
- Receive feedback on compliance status (CDP and ICLEI review data)

To “qualify” to be used as official GCoM reporting platform, CDP-ICLEI Track is fully compliant with the Common Reporting Framework (CRF) of the GCoM.

- 2 CDP-ICLEI Track is not the only reporting
- 3 platform used by the GCoM, but it is the only one with full global outreach

Direct Support to Local and Regional Governments

CDP-ICLEI Track - Examples of application of CDP-ICLEI Data

MATRYCS PROJECT: Modular Big Data Applications for Holistic Energy Services in Buildings

Services to support SECAPs impact assessment, implementation and monitoring

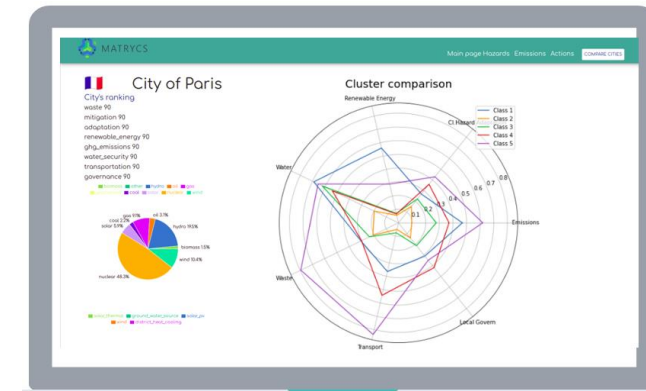

The CDP-ICLEI Track data (EU cities data is one of the many datasets used together with data from different city targets; buildings characteristics; smart meters readings etc

Based on the answers of the questionnaires, similarities between cities are calculated by clustering algorithms (K-means model, hierarchical) to provide insights in a visual friendly way, in order to support activities and measures related to climate change taken by cities.

- Support reinforcement of energy efficiency and renewable energy investments and other potential climate mitigation issues.
- Develop KPIs and metrics
- Inspire other cities

Visualization Engine

Chart Visualisations

Visualise your data using a variety of available chart visualisations (Pie Charts, Bar Charts, Gauge Charts, Radar Charts, Line Charts)

Map Visualisations

Visualise your data into responsive maps as long as they contain coordinate information

SQL Queries

Acquire the needed data and visualise them in tables by writing plain

```

query = {
  query: 'SELECT * FROM ...',
  components: ['query']
}

```

Welcome to MATRYCS Toolbox

Services

MATRYCS SERVICE3.1

The scope of the service is to support policy-makers, regarding climate change initiatives and action plans.

ePlanet: Public Local Authorities' Network for driving the Energy Transition

establish a transparent and coherent information sharing platform able to allow systematic data integration, direct comparison of ETM, policies and data among public authorities

The ePLANET IT platform will be prepared to automatically map and upload Baseline Emissions Inventory (BEI) and Monitoring Emissions Inventory (MEI) data of the municipalities and a breakdown of their energy transition campaigns. In addition, specific mitigation and adaptation actions taken until now or planned according to their SECAPs will also be uploaded

- Effective clustering governance using CDP-ICLEI and MyCovenant Data
- Better Data Flow at regional level on municipal climate reporting

Alignment with Reporting Requirements

TCFD Alignment

- ▼ The Task Force on Climate-related Financial Disclosure (TCFD) developed four widely-adoptable recommendations on climate-related financial disclosures that are applicable to organizations across sectors and jurisdictions.
- ▼ Corporations and capital market participants are engaging with and disclosing along the guidance of the TCFD, a parallel pathway for local governments is needed.

Governance

Disclose the organization's governance around climate-related risks and opportunities.

Strategy

Disclose the actual and potential impacts of climate-related risks and opportunities on the organization's businesses, strategy, and financial planning where such information is material.

Risk Management

Disclose how the organization identifies, assesses, and manages climate-related risks.

Metrics & Targets

Disclose the metrics and targets used to assess and manage relevant climate-related risks and opportunities where such information is material.

The 2023 Questionnaire is **fully aligned** with the Task Force on Climate-Related Financial Disclosures (TCFD)

- ▼ The TCFD offers a framework for incorporating climate-related risks and opportunities into risk management and strategic planning.
- ▼ Applying the TCFD framework to municipal operations can also enhance data collection and sharing, building internal capacity within local governments to manage climate risks more effectively.
- ▼ Reporting publicly can help you meet financial reporting responsibilities, unlocking opportunities to access finance and allow your projects to be climate finance ready for investors.
- ▼ CDP's Matchmaker project strengthens the capacity of cities to communicate municipal infrastructure projects to financial firms through project consultation and training.

Alignment with Reporting Requirements

TCFD Alignment

- ▶ The questionnaire has been designed to enhance the transparency of a city's climate-related risks and opportunities, strategies, and governance in line with recommendations from the TCFD.

Governance	Strategy	Risk Management	Metrics and Targets
Disclose the organization's governance around climate-related risks and opportunities.	Disclose the actual and potential impacts of climate-related risks and opportunities on the organization's businesses, strategy, and financial planning where such information is material.	Disclose how the organization identifies, assesses, and manages climate-related risks.	Disclose the metrics and targets used to assess and manage relevant climate-related risks and opportunities where such information is material.
Recommended Disclosures	Recommended Disclosures	Recommended Disclosures	Recommended Disclosures
a) Describe the board's oversight of climate-related risks and opportunities (0.2).	a) Describe the climate-related risks and opportunities the organization has identified over the short, medium, and long term (0.3, 1.2).	a) Describe the organization's processes for identifying and assessing climate-related risks (1.1, 1.1a).	a) Disclose the metrics used by the organization to assess climate-related risks and opportunities in line with its strategy and risk management process (1.2, 8.1, 9.1).
b) Describe management's role in assessing and managing climate-related risks and opportunities (0.2).	b) Describe the impact of climate-related risks and opportunities on the organization's businesses, strategy, and financial planning (0.2, 1.2).	b) Describe the organization's processes for managing climate-related risks (1.1a).	b) Disclose Scope 1, Scope 2, and, if appropriate, Scope 3 greenhouse gas (GHG) emissions, and the related risks (2.1, 2.1b, 2.1c, 2.1d, 2.1e).
	c) Describe the resilience of the organization's strategy, taking into consideration different climate-related scenarios, including a 2°C or lower scenario (7.1, 7.1a).	c) Describe how processes for identifying, assessing, and managing climate-related risks are integrated into the organization's overall risk management (1.1a).	c) Describe the targets used by the organization to manage climate-related risks and opportunities and performance against targets (4.1, 4.1a, 5.1, 5.1a, 6.1).
