Real Estate

Retail & Commerce

**MARMARA REGION, TOTAL AREA:
67.000 square km**

**Joined Global Covenant of Mayors
Initiative**

2021

MOBILITY PATTERNS:

In Avcılar, heavy private car use and local commuting needs cause traffic congestion, especially during peak hours. Although minibuses and buses are commonly used, they fall short of meeting demand. To improve mobility, the district is expanding pedestrian paths and enhancing cycling infrastructure to promote sustainable transport options.

NATIONAL GOVERNMENT

Avcılar is dedicated to sustainable development, focusing on enhancing public services and environmental conservation. The municipality has implemented initiatives to promote renewable energy usage, particularly solar power, and improve waste management systems. Efforts to protect natural areas and reduce the carbon footprint of urban development are central to the city's strategy. These actions aim to create a more livable environment, balancing growth with environmental protection, and ensuring Avcılar's resilience for future generations.

Avcılar is enhancing sustainability with smart waste management and eco-friendly transport. The municipality uses sensors for waste collection to improve efficiency and recycling. It also promotes electric buses and cycling infrastructure to reduce emissions, aiming to improve air quality and create a more sustainable urban environment.
