MOBILITY PATTERNS

Muğla's mobility is shaped by both local and tourist needs, with private vehicles and minibuses causing congestion, especially in summer. Limited public transit and narrow roads contribute to traffic, but cycling and pedestrian-friendly areas are being encouraged to ease the load.

KEY INTERESTING FACTORS

Tourism
Agriculture
Fishing and Aquaculture

KEY AREAS FOR COOPERATION

Renewable Energy
Waste Management
Sustainable Tourism

COORDINATION W/ INTERNATIONAL PARTNERS

NATIONAL GOVERNMENT

Muğla is committed to sustainable development by promoting eco-friendly tourism and enhancing waste management. The town focuses on increasing renewable energy use, particularly solar power, while implementing strategies to protect natural landscapes and water resources. These efforts aim to balance development with conservation, fostering a resilient community for residents and visitors alike.

Muğla is strengthening its sustainability efforts through projects focused on renewable energy and efficient waste use. Initiatives include generating clean energy from organic waste and utilizing solar power through rooftop installations. These actions aim to reduce emissions, promote energy independence, and support a greener, more resilient urban future.
