POPULATION: 695.771 (2023)

GEOGRAPHIC LOCATION OF SELÇUKLU

City AREA: 2.056 square kilometers km

**LEADING ECONOMIC SECTORS IN
SECUKLU**

Animal Husbandry

Agriculture

Industry

**CENTRAL ANATOIA REGION, TOTAL
AREA 163.000 square km**

**Joined Covenant of Mayors
initiative**

2024

MOBILITY PATTERNS:

Selçuklu's mobility patterns show a mix of local and tourist-driven demands within a compact, coastal setting. Private vehicles and minibuses dominate, causing congestion, especially in summer. Limited public transit and narrow streets add to traffic challenges, though pedestrian zones and cycling are being promoted to ease congestion.

ENERGY PRODUCTION

**MAIN SOURCES OF ENERGY
GENERATED**

COORDINATION W/ INTERNATIONAL PARTNERS

NATIONAL GOVERNMENT

Selçuklu is committed to sustainable development by promoting eco-friendly tourism and enhancing waste management. The town focuses on increasing renewable energy use, particularly solar power, while implementing strategies to protect natural landscapes and water resources. These efforts aim to balance development with conservation, fostering a resilient community for residents and visitors alike.

Selçuklu is enhancing sustainability through smart waste management and transportation initiatives. The town has implemented a sensor-based waste collection system to optimize efficiency and boost recycling. Additionally, Selçuklu is promoting electric minibuses and cycling to reduce reliance on private vehicles, aiming to improve air quality and create a more sustainable urban environment.

POTENCIAL AREAS

WASTE MANAGEMENT

ECO-FRIENDLY TRANSPORTATION

Implementation of Sustainable Projects

Solar Panel Project (2024)

Solid Waste Collection Project (2022)
