**GEOGRAPHIC LOCATION OF ORTAHISAR**

**City AREA: 232 square kilometers km**

**LEADING ECONOMIC SECTORS IN ORTAHISAR**

Fishery

Agriculture

Handicraft

**ENERGY PRODUCTION**

**MAIN SOURCES OF ENERGY GENERATED**

HYDROPOWER

WIND ENERGY

**BLACK SEA REGION, TOTAL AREA**  
163.000 square km

**Joined Global Covenant of Mayors initiative**

2025

MOBILITY PATTERNS:

Ortahisar's transportation system is shaped by local needs within a compact, coastal area. The dominance of private vehicles and minibuses often leads to traffic congestion, particularly during the summer months. With limited public transport options and narrow streets, mobility can be challenging. However, the municipality is encouraging walking and cycling to help reduce congestion and create a more accessible urban environment.

**Key Interesting Factors**

A key Logistics Hub

Fishery

Domestic and international flights

**KEY AREAS FOR COOPERATION**

Renewable Energy

Sustainable Agriculture

Sustainable Tourism

**TOPICS OF INTEREST:**

Business Models and Financing Schemes:

Financing Sustainability Projects

**Ortahisar Municipality signed the Global Covenant of Mayors in 2025 and is preparing its Sustainable Energy and Climate Action Plan (SECAP) to enhance energy efficiency and reduce emissions**

## Commitment to Sustainable Development and Innovative Solutions

### COLLABORATION

COORDINATING W/ LOCAL STAKEHOLDERS

COORDINATION W/ INTERNATIONAL PARTNERS

NATIONAL GOVERNMENT

Ortahisar is committed to sustainable development by promoting eco-friendly tourism and enhancing waste management. The town focuses on increasing renewable energy use, particularly solar power, while implementing strategies to protect natural landscapes and water resources. These efforts aim to balance development with conservation, fostering a resilient community for residents and visitors alike.

Ortahisar is advancing sustainability through efforts in waste management, clean energy, and transportation. Smart systems have been introduced to improve waste collection and support recycling, while steps are being taken to encourage eco-friendly mobility options such as cycling and low-emission transport. These initiatives aim to reduce environmental impact, improve air quality, and support a more livable urban environment.

### POTENCIAL AREAS

WASTE MANAGEMENT

ECO-FRIENDLY TRANSPORTATION

## Implementation of Sustainable Projects

Solar Panel Project (2024)

Solid Waste Collection Project (2022)
