MOBILITY PATTERNS:

In Yenice, limited public transport options, mainly buses, have led to a heavy reliance on private vehicles, resulting in significant congestion during peak hours. To promote sustainable urban mobility, the municipality is working to improve bus services and encourage a shift toward more efficient and eco-friendly transportation alternatives.

NATIONAL GOVERNMENT

Yenice is dedicated to sustainable development, focusing on reducing environmental impact and improving energy efficiency. The municipality has launched a Sustainable Energy and Climate Action Plan, developed with community input, to establish clear targets for emissions reduction and promote renewable energy sources. This collaborative effort aims to engage residents in achieving a more sustainable and resilient future for the district.

Yenice is promoting sustainability through initiatives aimed at improving urban life and protecting the environment. Key efforts include a zero waste project that encourages recycling and reduces landfill use, as well as tree planting campaigns that increase green spaces and support biodiversity. These actions contribute to a cleaner, healthier, and more resilient urban environment.
