CENTRAL ANATOLIA REGION, TOTAL AREA: 151.000 square km

City AREA: 13,902 square kilometers

LEADING ECONOMIC SECTORS IN ESKISEHIR

Joined Global Covenant of Mayors initiative

2016

MOBILITY PATTERNS

Eskişehir's mobility patterns indicate a reliance on private vehicles (around 60%) compared to public transport (40%), leading to traffic congestion during peak hours. To boost sustainability, the city is expanding its public transportation network and creating more bike lanes, encouraging eco-friendly travel to ease congestion and improve air quality.

ENERGY PRODUCTION

MAIN SOURCES OF ENERGY GENERATED

Key Interesting Factors

- Rich Mineral Resources
- Education
- Tourism

KEY AREAS FOR COOPERATION

- Waste Management
- Carbon Reduction
- Water Conservation

TOPICS OF INTEREST:

- Business Models and Financing Schemes:
- Financing Sustainability Projects

Eskişehir Province signed the Covenant of Mayors in 2011 and is preparing its Sustainable Energy and Climate Action Plan (SECAP) to enhance energy efficiency and reduce emissions

Commitment to Sustainable Development and Innovative Solutions

COORDINATING W/ LOCAL STAKEHOLDERS

COORDINATION W/ INTERNATIONAL PARTNERS

NATIONAL GOVERNMENT

Eskişehir Metropolitan Municipality is committed to sustainable development, focusing on environmental stewardship in its governance. The municipality has initiated programs aimed at reducing greenhouse gas emissions, promoting renewable energy solutions, and enhancing urban green spaces, with a goal of significantly decreasing emissions by 2030 compared to 2019 levels. These initiatives reflect Eskişehir's dedication to fostering a more sustainable and resilient urban environment.

Eskişehir Municipality is promoting sustainability through various initiatives, including solar energy projects to harness clean power, energy-efficient building practices in new developments, and efforts to expand green spaces and improve urban landscaping. These initiatives aim to reduce the district's environmental impact, enhance energy efficiency, and create a more sustainable and livable urban environment.

POTENCIAL AREAS

REDUCING EMISSIONS

REDUCING GREENHOUSE GAS

PROTECTING ECOSYSTEM

Implementation of Sustainable Projects

Integrated Solid Waste Management & Energy Production Facility(2021)

Eco-Friendly Mobility Project (2018)
