In Izmit, public transit, including buses and trams, accommodates many commuters, but private vehicles are the primary mode of transport, leading to congestion during peak hours. To address this, the city is enhancing public transit options, including planned expansions to bus and tram services, to encourage more residents to use public transportation and promote a sustainable urban transport environment.

NATIONAL GOVERNMENT

Izmit is committed to sustainable development, focusing on reducing its environmental impact and enhancing energy efficiency. The city has implemented a Sustainable Energy and Climate Action Plan, developed with input from local stakeholders, to set clear targets for emissions reduction and renewable energy expansion.

Izmit is advancing sustainability through several initiatives aimed at enhancing urban living and environmental health. One significant project is a smart waste management system that utilizes sensors to monitor waste levels, optimizing collection routes and improving recycling rates. This innovative approach helps reduce operational costs and landfill usage. The city is also upgrading public transport options to reduce emissions from private vehicles, thereby improving air quality.
