MOBILITY PATTERNS:

ENERGY PRODUCTION

MAIN SOURCES OF ENERGY GENERATED

NATURAL GAS

RENEWABLE ENERGY

In Beşiktaş, public transit, including buses and ferries, accommodates many commuters, but private vehicles remain the main mode of transportation, leading to congestion during peak hours. To combat this, the municipality is enhancing public transport options, increasing bus frequency, and improving ferry services to encourage more sustainable commuting.

**Beşiktaş Municipality signed the Covenant of Mayors in 2015 and is preparing its Sustainable Energy and Climate Action Plan (SECAP) to enhance energy efficiency and reduce emissions**

## Commitment to Sustainable Development and Innovative Solutions

### COLLABORATION

COORDINATING W/ LOCAL STAKEHOLDERS

COORDINATION W/ INTERNATIONAL PARTNERS

NATIONAL GOVERNMENT

Konya is dedicated to sustainable development, with efforts focused on reducing environmental impact and enhancing energy efficiency. The city has implemented a Sustainable Energy and Climate Action Plan, crafted with community input, targeting emissions reduction and renewable energy expansion. These initiatives aim to support a greener, climate-resilient future for Konya.

Konya is enhancing sustainability through initiatives like a smart waste management system that uses sensors to monitor waste levels, optimizing collection routes and increasing recycling. The city is also investing in renewable energy projects and upgrading public transport options to reduce emissions. Collectively, these efforts aim to decrease reliance on private vehicles, improve air quality, and enhance urban living conditions in Konya.
