LEADING ECONOMIC SECTORS IN YENICE

2024

Agriculture

Tourism

Forestry

MOBILITY PATTERNS:

In Yenice, public transport, mainly buses, is vital for commuters, but private vehicles dominate, causing peak-hour congestion. To address this, the municipality is enhancing public transit options, including improvements to bus services, to encourage greater use of public transport and support sustainable urban mobility.

ENERGY PRODUCTION

MAIN SOURCES OF ENERGY GENERATED

Yenice Municipality signed the Covenant of Mayors in 2024 and is preparing its Sustainable Energy and Climate Action Plan (SECAP) to enhance energy efficiency and reduce emissions

Commitment to Sustainable Development and Innovative Solutions

COLLABORATION

COORDINATING W/ LOCAL STAKEHOLDERS

COORDINATION W/ INTERNATIONAL PARTNERS

NATIONAL GOVERNMENT

Yenice is dedicated to sustainable development, focusing on reducing environmental impact and improving energy efficiency. The municipality has launched a Sustainable Energy and Climate Action Plan, developed with community input, to establish clear targets for emissions reduction and promote renewable energy sources. This collaborative effort aims to engage residents in achieving a more sustainable and resilient future for the district.

POTENCIAL AREAS

ECO-TRANSPORT

WASTE MANAGEMENT

Yenice is advancing its sustainability efforts through various initiatives focused on enhancing urban living and environmental health. One major project is the implementation of a smart waste management system that uses sensors to monitor waste levels, optimizing collection routes and boosting recycling rates. This approach not only lowers operational costs but also reduces landfill usage. Additionally, Yenice is upgrading its public transportation infrastructure to decrease emissions from private vehicles, which helps improve local air quality

Implementation of Sustainable Projects

Tree Planting Campaign (2020)

Zero Waste Project (2018)
